Give your end-users the eComPress advantage!

How does eComPress Publisher work?

- eComPress automatically creates publications from MS Word, XML or RTF files
- Data is compressed at bit level to 10% of original file size (includes viewer, links & index)
- Files are securely and uniquely encrypted each time
- Content is exhaustively indexed, so that Users can easily find what they need
- Compressed, encrypted & indexed content is accessed via embedded viewer

What are the unique features & benefits of this Software?

- Content is fast and easy for Users to access and read (much better than PDF)
- Publications are instantly usable on receipt, with no need to download readers
- Fully compatible with all 32bit Windows versions
- Decreases User stress and increases operational efficiency and productivity
- eComPress publications are easily printed & exported with the integrity of data intact

What are the Search capabilities?

- Guaranteed to find ALL information – precisely & instantly – every time
- All words, numbers and alpha-numerics are easily searchable
- Search hits easily identified with the HitMap and HitCount in the table of contents
- Logical (boolean) searching is supported
- Single and multiple character wildcards (guesses) can be searched

Why is eComPress so easy to access and navigate?

- Desktop icon makes publications instantly accessible from any Windows application
- Embedded eComPress Viewer is highly intuitive to all levels of Windows Users
- Navigation Quick-Start enables new Users to understand features in less than a minute

What about the Annotation facility?

- Annotation facility allows Users, Administrators or Publishers to add their own content
- Annotations are automatically transcribed in context to new and revised material
- User Notes are securely stored on the local disk drive for personal reference.
- Global Notes are ideal for collaboration and can be edited & read by all Users

What about Security, data integrity and controlled access facilities?

- Each publication is uniquely encrypted and cannot be changed (beyond annotations) to protect content integrity during distribution and use
- Publications can be locked and require an Authorization Key to be accessed
- All features can be configured to address specific customer security requirements

What are the key technical Specs and Considerations?

- There are never any software incompatibility issues because eComPress publications are delivered complete with their own built-in viewer/browser
- All the information can be viewed and searched within seconds of being received
- Publications can be viewed on any computer using any version from Windows 98 onward
- Large numbers of eComPress publications can be assembled in a product suite in an ad hoc manner and searched contiguously

Who is EIS?

- EIS is an established Australian-based Software development Company
- Our satisfied Customers include numerous leading Organizations worldwide
- eComPress technology has delivered millions of publications to a wide-range of Users
- We partner closely with Clients to create world-class Electronic Reference Publications
